8 ZONES SECURITY SYSTEM

DFA3300 8 ZONES

DFA3400 8 ZONES

**SUPERVISION
WIRELESS**

Digital Frontier All Rights Reserved

8 FULLY PROGRAMMABLE ZONES

Each of the zones are fully programmable (e.g. interior, exterior, entrance/exit door etc.) and can be activated for maximum protection whenever the zone is triggered.

2 PARTITION

The area partition allows the control panel to split zones into different area of operation. Each area carries a separate control for its designated functions. The panel operates effectively as two different systems by sharing with one alarm outputs.

BUILT-IN SMART DIALER

The smart dialer built in the system is able to inform you when the alarm is triggered. It is so powerful that you are even able to arm or disarm the system through any touch tone phone. There are a total of four phone numbers that can be programmed.

BUILT-IN HOME AUTOMATION (2PGM)

The control panel in the system can turn your system on or off with your PIN number and control outputs that activate anything that can be switched on and off (light, electric door, radio, air conditioner and etc.)

SUPERVISION WIRELESS CAPABILITIES (DFA3400)

SUPERVISION

- ◆ A new standard feature that help increase the reliability of wireless sensor.
- ◆ Supervision performs full monitoring of the wireless sensor and allows to detect dead or missing wireless sensor.

CODE COMBINATION (65536)

- ◆ Determine the security level of the system.

CODE SETTING (Learning)

- ◆ Learning is the new standard for code setting. It allowed fast setting for new installation. It also allow flexible setting when re-configure of current system.

ONE YEAR WARRANTY AGAINST LIGHTNING STRIKE

The control panel is fully protected by a suppressor to suppress high current surge causes by lightning.

8 Programmable Zones

Maximum 6 Keypads

Baby Friendly Commands

Built-in One Touch Arming

Status Indicators

Event Memory

2 Partition

Zone Sensitivity Adjustable

Intelligent Switching Arming Mode

Multiple User Codes

Built-in 2 Automation Point

Built-in Multiple Fuses for Better Protection

Keypads Lockout to Prevent Unauthorized Guessing

2 Intelligent Zones to Minimize False Alarm

Programmable Siren Timer

Both Way Reporting to CMS & 4 Personal Numbers

Fax Machine Override

Remote Arm/Disarm Via Mobile Phone

All Triggered Zones Indication Via Mobile Phone

All Zones Status Check Via Mobile Phone

Remote On/Off Automation Via Mobile Phone

Home Automation - Active During Entry & Exit Time

Home Automation - Follow Zone Triggered

Home Automation - Follow Trouble Condition Exists

Dynamic Battery Test

Door Chime

Walk Test Mode

Watchdog Monitoring to Prevent Lightning Surge
